

How will the changes in the 2011 NEC impact your business, customer, design and installation of your next electrical system?

Take this opportunity to learn about these changes directly from the people who help make the decisions to revise the NEC.

At each of five regional section meetings across the country, International Association of Electrical Inspectors gathers the most comprehensive set of *National Electrical Code* experts to discuss the revisions to the 2011 NEC.

IAEI Regional Section Meetings

Section	Dates	Hotel	Location
• Northwestern	Sept. 12–15	Grove Hotel/Convention Center	Boise, ID
• Western	Sept. 19–22	Regency Suites	Green Bay, WI
• Eastern	Sept. 30–Oct 3	Resort & Conference Center at Hyannis	Hyannis, MA
• Southern	Oct. 10–13	Marriott Riverfront	Savannah, GA
• Southwestern	Oct. 17–21	Pointe Hilton Squaw Peak Resort	Phoenix, Arizona

No other educational program in the country brings together more NEC code-making panel members to discuss NEC requirements—in depth, in clarity, in expertise, and with total focus.

Provide you and your business a serious advantage over your competitor by understanding which safety restrictions have been added and where permission has been granted to relax present restrictions to the NEC.

Instill confidence in your customer by demonstrating to your customer your knowledge of changes that can benefit them.

Determine the most cost effective and reliable means to design, install and operate an electrical system while being compliant to the 2011 NEC.

IAEI continues to be your premier resource — first in time, first in learning, first in leadership — in understanding the latest revisions to the NEC.
