

Tentative Interim Amendment

## NFPA<sup>®</sup> 70

### National Electrical Code<sup>®</sup>

2014 Edition

**Reference:** 590.6(A)(1)

**TIA 14-6**

*(SC 14-8-15 / TIA Log #1133)*

Pursuant to Section 5 of the NFPA *Regulations Governing the Development of NFPA Standards*, the National Fire Protection Association has issued the following Tentative Interim Amendment to NFPA 70, *National Electrical Code<sup>®</sup>*, 2014 edition. The TIA was processed by the NEC<sup>®</sup> Code-Making Panel 3 and the National Electrical Code<sup>®</sup> Correlating Committee, and was issued by the Standards Council on August 14, 2014, with an effective date of September 3, 2014.

A Tentative Interim Amendment is tentative because it has not been processed through the entire standards-making procedures. It is interim because it is effective only between editions of the standard. A TIA automatically becomes a public input of the proponent for the next edition of the standard; as such, it then is subject to all of the procedures of the standards-making process.

*1. Revise 590.6(A)(1) to read as follows:*

#### **590.6 Ground-Fault Protection for Personnel.**

##### **(A) Receptacle Outlets.**

**(1) Receptacle Outlets Not Part of Permanent Wiring.** All 125-volt, single-phase, 15-, 20-, and 30-ampere receptacle outlets that are not a part of the permanent wiring of the building or structure and that are in use by personnel shall have ground-fault circuit-interrupter protection for personnel. In addition to this required ground-fault circuit-interrupter protection, listed cord sets or devices incorporating listed ground-fault circuit-interrupter protection for personnel identified for portable use shall be permitted.

**Issue Date:** August 14, 2014

**Effective Date:** September 3, 2014
